

PATHFIT II RHYTHMIC *Activities*

Prepared by: PE InstructorsS
2024-2025

RHYTHMIC ACTIVITIES

- Are the physical manifestations of the mental and emotional response of the individual to rhythm.
- They are activities which a child responds to physically, socially, and mentally to regular patterns of sounds.

RHYTHM AND RHYTHMS

- **RHYTHM** - This is the *regular recurrence of accented and unaccented beats*.
- **RHYTHMS**- is a term that denotes *an aspect of a quality of movement* that is sometimes thought of as dance.

DANCE AND DANCING

Dance

- the art of movements refers to movement set to music where organization, structure and pattern emerge.

Dancing

-It is a form of expressing one's emotions through movement disciplined by rhythm. It is an act of moving rhythmically and expressively to an accompaniment

Danson

The word dancing came from an old German word “danson” which means to “stretch”. Essentially, all dancing is made up of stretching and relaxing

ELEMENTS OF MOVEMENT

SPACE

Focus

- This is referred to as movement in space in relation to an object.

Range

- refers to the area covered as the body moves.

Level

- is the movement through space that maybe done at a high, low, or medium level.

Direction

- is the line of movement taken which maybe forward, backward, sideward, diagonal, upward, or a combination of those mentioned

Floor Patthern

- the path or design that is made while moving in space is what is termed as floor pattern. It may take the form of a circle, square, straight line, or zigzag

TWO KINDS OF SPACE

Personal Space

- it is maximum space available to a person in stationary position.

General Space

- it is the area in which one or more person is moving.

THREE FACTORS THAT GOVERN OR AFFECT MOVEMENT

Psychological- are the positive and negative emotions that you will be having when you are dancing.

Physiological- represents the physical fitness and body built that may affect human movement.

Sociological- refer to the relationship of the performer with a particular group.

TWO KINDS OF MOVEMENTS

Locomotor movements- refer to the movement in which you are moving from one place to another place.

Walking, running, jumping, hopping, skipping, leaping, galloping and sliding

Non locomotor movements- are those in which various parts of the body move in space with a fixed base.

DANCE ELEMENTS

Theme

- the content or the main ingredients of a dance. Message of the dance.

Movement

- an act of changing physical location or position or of having this changed.

Choreography

- forms and arrangement of a dance. Connected with the steps and movement on how a dance must be performed.

Music

- auditory background to which a dancer moves.

Design

- pattern of movement in time and space.

Technique

- skills in executing movement.

Costume and Properties

- worn by the dancer that help reflect the message, customs, beliefs and setting of the dance.

Scenery

- the setting background establishing the place of action of any dance.

FUNDAMENTAL POSITION OF ARMS AND FEET

There are five fundamental or basic positions in dance that are commonly learned as the 1st position, 2nd position, 3rd position, 4th position, and lastly the 5th position of the arms and feet.

First Position

- **Feet:** heel close together, toes apart with an angle of about 45 degrees.
- **Arms:** both arms raised in a circle in front of the waist with finger tips.

Second Position

- **Feet:** feet apart sideward of about a pace distance.
- **Arms:** both raised sideward with a graceful cur at shoulder level.

Third Position

- **Feet:** heel of one foot close to in-step of other foot.
- **Arms:** Right hand raised overhead slightly flexed at elbow and left hand in front position.

Fourth Position

- **Feet:** one foot in front of the other of a pace distance
- **Arms:** one arm raised in front as in 1st position; other arm raised overhead

Fifth Position

- **Feet:** heel of front foot close to big toe of rear foot.
- **Arms:** both arms raised overhead

..... *fin*
